

ABSTRACT OF THE DISCLOSURE

A washing and drying machine and a clothes dryer including an air circulating duct for circulating air into an inner tub for washing or drying inputted clothes. An inner portion of a drum and an evaporator of a refrigerating cycle may be positioned in the air circulating duct to dehumidify the circulated air to improve the efficiency of the dehumidification process of the circulated air, to reduce the required time for drying clothes and to reduce energy consumption.

ABSTRACT OF THE DISCLOSURE

A ~~washing/drying~~ washing and drying machine and a clothes dryer including an air ~~circulative~~ circulating duct for circulating air into ~~the~~ an inner tub for washing or drying inputted clothes ~~or an~~. An inner portion of a drum and an evaporator of ~~the~~ a refrigerating cycle, may be positioned in the air ~~circulative~~ circulating duct to dehumidify the circulated air ~~can improve dehumidifying performance~~ to improve the efficiency of the dehumidification process of the circulated air, to reduce the required time for drying clothes and to reduce energy consumption.
